Problem Statement

The need for a professional and modern online presence
to showcase skills and projects.

The challenge of effectively presenting a frontend developer's abilities to
potential employers or clients.

Project Overview

A personal portfolio website built to highlight frontend development skills.

A single-page, responsive design featuring sections for Home, About, Projects, Skills, and Contact.

End Users

Potential employers: Recruiters and hiring managers looking for skilled frontend developers.

Clients: Individuals or businesses seeking a web developer for their projects.

Fellow developers: Peers interested in modern web development practices and design.

Tools and Techniques

Languages: HTML, CSS, and JavaScript.

CSS linear-gradient for a vibrant background.
backdrop-filter to create a modern "glassmorphism" effect for
sections.

Theme Toggle to switch between light and dark modes.

Portfolio Design and Layout

A clean, user-friendly interface with clear navigation.

A visually appealing hero section with a floating profile image.

Structured content within "glossy" sections to create a cohesive aesthetic.

Feature and Functionality

Interactive hover effects on project cards and skill badges.

A functional contact form for direct communication.

Dynamic content that changes with the user's interaction, such as the theme toggle

Results and Screenshot

A finished, live website that effectively showcases skills.

A clean, professional design that reflects the developer's attention to detail.

Conclusion

The project successfully serves as a comprehensive digital resume.

It demonstrates proficiency in core frontend technologies and modern design principles.

A valuable asset for career advancement and professional networking.

Thank You
